Plans for this Week

Business Statement Report would be finished until Friday. Also, all the group members were assigned to different tasks for the next three weeks. As mentioned in the Business Statement, each member of the group had a project to research on. Elif Merve was assigned to Cat Feeding project, Emre Deniz was assigned to Valet Parking Project, Melike and Fahri were assigned to Where Am I Project and Yunus was assigned Gimme Fast Project. Also, it was planned that each group member would read the Proposal Report webpage and examine its format and its requirements.

Works Done this Week

We completed the Business Statement Report and submitted on Thursday. We prepared the time schedule until the submission of the Proposal Report. After the individual researches on each project, we discussed all the outcomes of the projects. Although we thought we were sure about the Valet Parking project, we decided to deeply analyse Where Am I project again. We eliminated other projects.

Plans for the Next Week

Until next week's meeting, we are going to decide on our project as we informed in the time schedule. After the decision, we will define the societal impact and problem statement. We will have a brainstorming session on the selected project. Elif Merve, Emre Deniz and Fahri will study on the outlines of the requirements for the standards of the project. Melike and Yunus will study the deliverables and expected outcomes of the project.
